TOM VUARCHEX
[Artist]

Graphic designer by training, Tom arrived in the gaming world in the mid-90s by self-publishing Jungle Speed, of which he is a co-author. Since then sporadic author and intermittently «illustrative designer», he leads the adventure of the Twin it range, from the poster to the Japanese edition.

RÉMI & NATHALIE SAUNIER
[Authors]

Inseparable lovebirds, they have scoured festivals for years with a cart of game projects. Rémi is always at the initiative of ideas, but they develop them together. Since 2015, good fortune has smiled on them with the first card game version of Twin it.

NAÏADE
[Illustrator]

Passionate about sport and of course drawing for a long time, Naïade trained in architecture, object design and narrative drawing. Today illustrator of dozens of games, but also of books, he put his talent at the service of Twin it.

Homogeneously symbolizing a culture as vast as Japan while respecting the constraints of "twinization" is a demanding exercise. Minimalism, ingenuity and graphic precision make it possible to achieve an "obvious" image, making the work necessary to achieve it invisible. The illustrator, Naïade, gives us a brilliant demonstration, through his choices, mixing traditional symbolisms, more personal and contemporary references. 119 images is a lot and it is not much, Twin it Japan is not intended to be an exhaustive vision but a "Naïadish" Japanese walk. This notebook gives you some keys to his visual haikus...
